

IN THE SPECIFICATION

Please amend the paragraph at page 56, lines 10-13, as follows:

In subscreen ~~1330~~ 1430, it is possible to stipulate the dimensions of the said zone by selecting button 1410 then selecting one of the vertices of the said zone and moving it as desired, while the other vertices remain unchanged. Selecting a contour point of the zone other than a vertex makes it possible to define a new vertex.
